

## Recommendation Letter

I am writing this letter to you as a recommendation for the services provided by RS Consult BG. For the past few years I have been working hand in hand with RSC on data analytics and financial report generation. At no one time have they failed me, and they have always been on time, making them a reliable partner to us.

Our first engagement with RSC was on a project for loading the financial data from the ERP system to the company's data warehouse. The team brought along some good expertise that helped us finish the task relatively fast.

I would like you to consider RS Consult BG for your data analytics needs. I have had a good experience over the past few years with the services they have rendered to us. I therefore strongly recommend them as a service provider. Let me know if you need any previous working record regarding RSC

Yours Sincerely,

Boris Balev  
CEO  
Este Properties
