

Letter of Recommendation

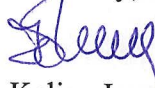

To whom it may concern:

I am pleased to recommend the services of RS Consult BG for any type of projects involving data analytics and the coordination of any other sub contract work associated with data. In 2018, RSC was able to perform analysis of our ERP system and extract and organize the data from it into a data warehouse in a suitable way for reporting in Port Rail OOD which is a Group company specialized in railway transport. The company owns 16 locomotives and provides railway shunting at the main railway stations in Bulgaria, as well as on the territory of port terminals Burgas East II and Burgas West.

Under RSC's direction, we were able to map all accounts needed and verify all report positions. During and after the whole project, we've been getting absolutely amazing support from their experienced team. The project was completed in a timely manner.

Please feel free to contact me at any time to discuss any further details about RSC. I feel confident in their ability to meet and exceed your expectations.

Sincerely,

Kalina Ivanova
Chief Accountant
Port Rail OOD
