

Letter of reference

We started working with RSC in the late 2017. We were able to successfully implement automated financial reporting on both individual and group company levels. We also implemented automated financial consolidation for more than 100 companies under the Advance Properties umbrella, including the consolidation of all its subgroups.

Together with RSC, we breezed through all project stages – consulting, planning, design, implementation and support. The scope of the project included data warehouse modeling and implementation, ETL design and processing from various source systems, creation of user-friendly forms and reports, data visualization for the needs of reporting and auditing. We used the IBM Cognos family tools to facilitate enterprise-wide reporting and analysis.

Working with RS Consult BG has been a wonderful experience. We are very pleased with their technical knowledge, responsiveness and eagerness to work with our team.

RSC was extremely accommodating to our requirements and had a very professional approach to all provided tasks. Additionally, they gave us a plethora of useful ideas throughout our collaboration on how to optimize our work process and save time.

Having worked with them for so long, we have the pleasure of recommending RS Consult BG, as a highly reliable company, specialized in the area of Data warehouse modeling and implementation and Business intelligence solutions.

February 3rd, 2020

Respectfully,

Tonka Yankova
CFO, Advance Properties
